

## When will I have my second coronavirus vaccine?

You have had your first vaccine and will need to have another vaccine in 10- 12 weeks. This is called a second dose

It is very important to have both vaccines. It makes them work better to keep you safe

We had told you that you would have your second vaccine in 3-4 weeks. This has now changed

Scientists have said that it is better to give lots of people their first vaccine before giving other people their second vaccine

This is because it keeps lots more people safe

You do not need to worry

You will still get your second vaccine

This will be in 10-12 weeks

Remember to stay safe you must still follow the rules

Wash your hands when you get home, before you eat and before you touch your face

You must keep 2 metres away from other people
